

Proteus XR/i

The broad clinical flexibility of Proteus XR/i system enables you to undertake a wide variety of radiographic studies, including tomography as an option. The floor-mounted tube stand, the floating Bucky table and the electromagnetic brakes make for quick and easy patient positioning. The elevating table is equipped with central foot switches. The wall stand with oscillating Bucky allows fast and accurate positioning.

- *Elevating table and large patient coverage*
- *Tomography option*
- *HF generator with APR*
- *Transversal tube travel*
- *AEC and dose meter option*
- *Great reliability and easy to use*

Standard 50KW, three phase, APR, AEC, elevating table, wall stand : S15831ED

Standard 64KW, three phase, touch screen console, APR, AEC, elevating table, wall stand : S15831EG

Option : S15831G LS tube 1/2mm, 140kHU ; S15831GC LS tube 0.6/1.5mm 200kHU ; S15831GA HS tube 0.6/1.2mm, 300kHU ;

S15831GZ collimator rotation, S15831GD dose meter with printer, S15831GG auto collimation,

S15831H compression band, S15831HA hand grips, S15831HB wall bucky support, S15831HC lateral cassette holder,

S15831HG external cassette holder 40x120cm, S15831GS +/- 15cm transverse tube travel

Proteus XR/I Performance at your service
